DISCOLORATION & TUNING

Discoloration of exhaust is generally a result of improper fuel calibration & tuning. In addition, discoloration can be the result of electrical issues or engine malfunction. Discoloration is not the result of defective plating or coating and as such, is not a warrantable item. Modifying the factory tuning, including but not limited to adjusting the air/fuel ratio from the stock setting on a catalyst equipped motorcycle is likely to result in discoloration. Discoloration, in this case, is the result of negligent tuning and will not be warranted as a manufacturing defect.

Rinehart Racing™ Slip On Mufflers are designed and intended for use on Harley-Davidson Touring Model OEM factory stock head pipes. Discoloration is not a manufacturing defect and therefore is not a warrantable item. See Warranty for more information.

INSTALLATION INSTRUCTIONS

1. Remove OEM muffler and mounting hardware. Do not discard OEM muffler clamp or bolts.
 2. Install OEM muffler clamp onto the muffler inlet of Rinehart Slip-on mufflers in the same orientation as it was removed.
 3. Rinehart recommends replacing the inlet gasket with a new HD gasket. HD Part # 65900040.
 4. Slide the muffler onto the OEM header until brackets come into alignment. Intstall heat shield on muffler canister using hose clamp to secure it to the inlet of the muffler. Make sure that the heatshield on muffler slips under the stock shield.
 5. Reinstall the bolts removed earlier into OEM bracket.
 7. Tighten muffler bolts 12-14 lb-ft. and the OEM muffler clamps torque 45-60 lb-ft. Retighten the heat shield clamp.
 8. Before starting engine, clean off all fingerprints and grime using a mild liquid soap and a microfiber cloth.
 9. Check all mounting fasteners after first ride and again at all service intervals.
- Important! Wipe down complete system with cleaner before starting bike to remove any fingerprints, dirt, dust or debris.**
- NOTE: Fingerprints, residues, dirt and/or dust that are not removed before running will become permanently etched in the pipes.**
- Check all mounting fasteners after first ride and again at all service intervals.**

EMISSIONS NOTICE
